# With the new AeraMax® Professional with PureView™ technology, the invisible becomes visible.

*With our advanced and upgraded EnviroSmart™ 2.0 technology, dual self-regulating and self-cleaning laser particle sensors continually read the air, measuring air particles and adjusting to maximize efficiency*

*Our new units offer visual display screens, so you know what's happening, when it's happening. You can get a measure of particles going into the PureView™, as well as the lack of particles coming out.*

## ▶ SCREEN 1 Air Quality

## MEASURING & MAXIMIZING

Now your occupants can see for themselves—simply, and in plain sight—how seriously you take indoor air quality and the need for a truly clean environment. **PureView™** shows the status of the current room air quality including the percentage of particles captured and removed from the air by the unit.

## WATCHING THE DETECTIVE

The displays also detect harmful **volatile organic compounds (VOCs)** and odors in the adjacent air, providing a visual readout to determine the presence of the obnoxious—and noxious—pollutants.

With just a glance, you can see the effectiveness of AeraMax with PureView technology.

## TWO MODES, NO WAITING

PM 2.5

PM 10

The **PureView™** units offer two viewing modes: PM2.5 and PM10. In **PM2.5** mode, the unit measures the PM2.5 particles, like viruses, germs, and smoke, in the air, as well as the amounts outputted by the unit. In **PM10** mode, the unit measures the larger PM10 particles coming in and out of the unit.

FILTER

Another great feature of the AeraMax Professional **PureView™** is all about convenience. The visual display also showcases when you need to replace the unit's filters with a "Life Remaining" status. It truly is "set it and forget it"—with the unit informing you when to change the filters for maximum efficiency.

## VISUALS YOUR WAY—OR NOT

We even allow you to adjust the brightness of the **PureView™** display, so you can easily read the display even if it's farther away.
